

PLEASE TAKE NOTE OF THE FOLLOWING

All animals should have the following vaccines before being accepted for Air Transportation.

- Puppies and kittens can only fly from the age of 8 weeks.
- Combination Vaccine
 - 5-in-1 for Dogs
 - 4-in-1 for Cats
- Rabies Vaccine
- There is a waiting period of 7 days for booster & 14 days for 1st time inoculations for ALL vaccinations, prior to the pet travelling.
- Animals older than 3 months must be inoculated against Rabies, this should be done annually.
- If your animal is younger than 3 months old and does not have their own rabies vaccination, a clear, legible copy of the mothers VET BOOK with an updated rabies vaccine must be provided.
- The animal should have their own vet book with their combination vaccine.
- In cases where the puppies and kittens have been rescued and there is no record of the mom – The animal requires their own rabies & combination vaccination, a 14 day waiting period is applicable.
